Summary

I am a Cloud Engineering graduate with an MCA in Cloud Technology, having experience in building automated data infrastructure on AWS and Azure. I am seeking Cloud Engineer roles to leverage my skills in infra automation and cloud architecture. I am available for immediate opportunities.

Education

JAIN (Deemed-to-be-University), MCA in Cloud – Bengaluru Aug 2025 – present

- Specializing in Cloud Technology with CompTIA Cloud+ certification in progress.
- Completed [AWS Academy](#) 📄 60hr Cloud Architecting training covering infra automation.
- SGPA: 8.3/10

Aryabhatta Knowledge University, BCA in CS – Patna June 2021 – June 2024

- Completed [CCNA](#) 📄 Workshop with Grade 'B' Certification.
- CGPA: 8.2/10

Work Experience

Data Engineering Intern 📄, J2D Technologies Pvt. Ltd. – Bengaluru June 2026 – July 2026

Internship on building and maintaining cloud data pipelines with Python and automation tools.

- Designed and deployed Azure Data Factory (ADF) pipelines to enable automated data ingestion, while also incorporating infrastructure and configuration management principles.
- Built a Databricks monitoring dashboard and authored PySpark scripts to automate large scale data transformations cutting processing time by 40%.

Projects

FinGuard - Real-Time Credit Card Fraud Detection 📄 – Bengaluru June 2026 – July 2026

End-to-end streaming project on Databricks.

- Implemented a Bronze-Silver-Gold medallion architecture on Delta Lake.
- Built a real-time monitoring dashboard and implemented automated fraud alert emails for each Gold table detection event, showcasing our deployment automation capabilities.
- Enhanced streaming data by integrating master records for over 1,000+ customers through PostgreSQL batch ingestion.

Cloud Atlas - Monolith to Microservices Workflow 📄 – Bengaluru Apr 2026 – May 2026

Self Initiated Cloud Infrastructure Project.

- Deployed a monolith into two microservices on AWS ECS Fargate, eliminating single point of failure.
- Built two fully automated CI/CD pipelines using Blue/Green deployments, achieving zero downtime releases and enabling 5-minute automated rollback capabilities.
- Independently scaled the customer microservice from 1 to 3 tasks, successfully validating horizontal scalability while maintaining the integrity of the employee service.

Skills

Cloud Tech: AWS (EC2, S3, VPC, ALB, ECS, Fargate, CloudWatch), Terraform, Docker, Azure Databricks, Azure Data Factory

Programming: Python (scripting, automation), SQL, Node.js/Express

Data Engineering: PySpark, Delta Lake, PostgreSQL, MySQL

Developer Tools: Git, GitHub CLI, Linux, REST API

Certifications

- Earned certifications from industry leaders including [AWS \(CI/CD\)](#) 📄, [AWS \(Cloud Architect\)](#) 📄, [Oracle \(OCI AI\)](#) 📄, [Databricks \(GenAI\)](#) 📄 & [Anthropic \(MCP\)](#) 📄
