About Me

I am an MCA grad with experience in Cloud Tech, proficient in Python, PySpark, SQL, AWS, and Azure Databricks. I excel in building end-to-end data systems and integrating AI-assisted tools into my daily development workflows. I am currently seeking a software engineering role where my cloud-native mindset and hands-on project experience can contribute to delivering production-grade solutions.

Education

JAIN (Deemed-to-be-University), MCA in Cloud – Bengaluru, Karnataka Aug 2025 – present

- Completed [AWS Academy](#) 📄 60 hour Cloud Architecting training covering infrastructure design and automation.
- Specializing in Storage and Cloud Technology with CompTIA Cloud+ in progress. SGPA: 8.3/10

Aryabhata Knowledge University, BCA in CS – Patna, Bihar June 2021 – June 2024

- Completed [CCNA](#) 📄 Workshop with Grade B Certification. CGPA: 8.2/10

Experience

Data Engineering Intern 📄, J2D Technologies Private Limited – Bengaluru June 2026 – July 2026

Hands-on internship designing and maintaining cloud data infrastructure using Python and automated pipeline tooling.

- Designed and deployed Azure Data Factory (ADF) pipelines for automated data ingestion, applying infrastructure and configuration management principles.
- Built a Databricks monitoring dashboard and wrote PySpark scripts to automate large-scale data transformation, documenting architecture along the way.

Projects

FinGuard - Real-Time Credit Card Fraud Detection 📄 – Bengaluru June 2026 – July 2026

End-to-end streaming data engineering project on Databricks, designed with scalability and automation as core architectural goals.

- Architected a Bronze-Silver-Gold medallion architecture on Delta Lake with built-in data quality checks for scalable, maintainable infrastructure.
- Built a real-time monitoring dashboard and triggered automated fraud alert emails on each Gold table detection event, demonstrating deployment automation.

Skills

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, CloudWatch), Azure Data Factory, Azure Databricks, Cloud Infrastructure Design, Automation Principles

Programming: Python (OOP, scripting, automation), SQL, Java, C/C++ , JavaScript

Data Engineering & Databases: PySpark, Delta Lake, Confluent Cloud Kafka, PostgreSQL, MySQL, Delta Tables

Developer Tools: Git, GitHub CLI, Linux, REST APIs, Version Control & Collaborative Workflows

Certifications

- Earned certifications from industry leaders including [Google \(Python\)](#) 📄, [Accenture \(AI\)](#) 📄, [Meta \(MySQL\)](#) 📄, [Databricks \(GenAI\)](#) 📄, [Oracle \(OCI AI\)](#) 📄, [Anthropic \(MCP\)](#) 📄, [AWS Academy \(Cloud Architect\)](#) 📄, [AWS \(Cloud Practitioner\)](#) 📄 & [Deloitte \(Real-world Readiness\)](#). 📄
